## DEPARTMENT OF FISH AND GAME

POST OFFICE BOX 47  
YOUNTVILLE, CALIFORNIA 94599  
(707) 944-5500

July 29, 1993

Mr. Al Haynes  
San Lorenzo Water District  
13060 Central Avenue  
Boulder Creek, California 95006

Dear Mr. Haynes:

This letter confirms our discussion during the Department's field visit on July 7, 1993. During the field visit, we observed most of the components of your project to provide filtration for your surface water sources. The completed project will include a five-mile pipeline composed of eight-inch polyethylene pipe placed on the ground along a seasonal access trail, except where braces are needed to cross drainages. The pipeline will connect to the Big Con Treatment Plant and storage tanks now under construction. Two water diversions, Sweetwater and Clear creeks, will be moved upstream closer to the pipeline.

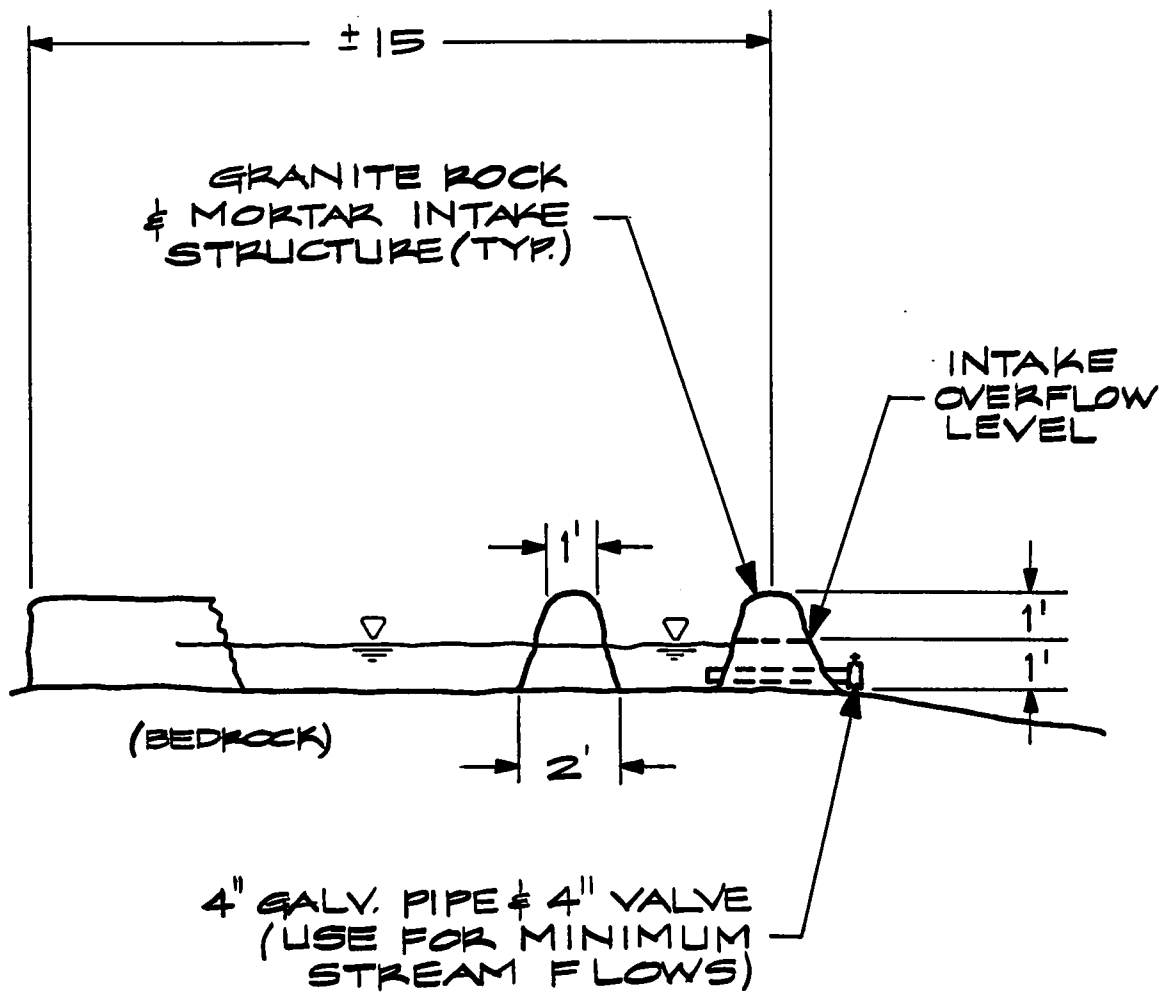

The Department has no objection or concerns with this project if the project is executed in the manner observed and described. However, it is important that the braces are not placed in the streambed or banks. It is also important that proper erosion control measures are implemented, if necessary. It was stated that the upstream change in the placement of the water diversions, from both Clearwater and Sweetwater creeks, will result in no increase in water use or increase in water service capability. Thus, a streambed alteration agreement will adequately address any Department concerns. Removal of the existing water diversion structures will be required.

Thank you for the opportunity to observe and comment on this project. If you have any questions or concerns, please call Patricia Anderson, Unit Fishery Biologist, at (408-353-2275); or Carl Wilcox, Environmental Services Supervisor, at (707) 944-5525.

Sincerely,

A handwritten signature in cursive script that reads "Brian Hunter".

Re: PROPOSED CHANGE IN POINT OF DIVERSION CLEAR CREEK,  
SWEETWATER CREEK AND HARMON CREEK, SANTA CRUZ COUNTY

Dear Mr. Gunby:

San Lorenzo Valley Water District is the holder of pre 1914 water rights on several creeks in the San Lorenzo River Watershed. Three of these creeks, Clear, Sweetwater and Harmon, are proposed to move the point of diversion upstream, higher in the watershed. This is to facilitate the use of a new gravity-fed pipeline, conveying this surface water to a new water treatment plant required by the State Health Department under the Safe Drinking Water Law.

The attached map, using the USGS Quad Sheets as base, shows the locations of the existing points of diversion and the proposed points of diversion. The existing diversions can be found in the SWRCB files under the following:

Clear Creek	500 8416✓
Sweetwater Creek	500 8671✓
Harmon Creek	500 8758✓

Also enclosed are copies of typical views of the standard engineering drawings of the proposed diversions. I have also included a letter from the State Department of Fish and Game, written after a site visit last year to the proposed diversion points and the existing diversions. We are currently awaiting a 1601 permit to enable construction of the new diversions next Spring. I have also included a description of the existing locations and proposed locations of the diversions showing township Range and Section as well as elevation. Should you or other staff from the SWRCB wish to inspect the sites, please contact me for access, as these points are in remote locations in the watershed on lands owned by the District.

Dear Mr. Hayes:

## STATEMENT OF WTER DIVERSION AND USE NO. 8416 ET AL

In response to your letter of January 5 addressed to Ralph Gunby of this office and my phone conversation with you on the 18th, the proposed changes in the points of diversion on Clear Creek (S-8416), Sweetwater Creek (S-8671) and Harmon Creek (S-8758) will not be entered in the files until you advise that the changes have been made.

Our records indicate that no Supplemental Statement has been filed for the following: number 8416 covering the years 1989, 90 & 91; numbers 8668 through 8671, 8743, 8744 and 8758 covering the years 1991, 92 & 93.

If you have any questions, please call me at (916) 657-1875.

Sincerely,

#### GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

An appropriative right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include:

"Statements of Water Diversion and Use"

"Information Pertaining to Water Rights in California"

"Water Rights for Stockpounds Constructed Prior to 1969"

"Appropriation of Water in California"
